

Rainmaker: The Sage of Jeff Beck, Wall Street's Mad Dog

Even by the standards of Wall Street in the 1980s, Jeff Beck's amazing life story was too good to be true. One of the Street's most prominent investment bankers, Beck was involved in many of the biggest deals of the decade & made a fortune in the process. He was the Mad Dog, a veteran of hand-to-hand combat in the jungles of Vietnam & a secret billionaire. The only problem was, none of this was true. Bianco follows Beck's career from its beginnings & weaves together the contradictory strands of his personality. His story is a metaphor for an era that prized shadow over substance, expediency over heroism, money over love.
