

Shadows of the Dark Crystal #1 (Jim Hensons The Dark Crystal)

Praise for *Shadows of the Dark Crystal*: With deft nods to the original *Dark Crystal* movie and a passionate attention to detail, the author has fashioned an impressive prequel. Fans (who will instantly recognize certain elements) and newcomers alike will find themselves immersed in a new narrative, with new protagonists and dangers to face. Readers who crave otherworld fantasy such as Jaleigh Johnson's *The Mark of the Dragonfly* and Paul Durhams *The Luck Uglies* will enjoy discovering this new series. *School Library Journal* While young readers probably won't have seen the film, the books might lead them to it; even if they don't have that point of reference, Henson's world is richly imagined here, and it will be well worth the projected four books to explore the landscape, characters, and storylines. *The Bulletin of the Center for Children's Books* Characters and situations are compelling, and this first of a planned four-volume series aptly sets the stage and the conflict and tugs strongly on the heartstrings, setting readers up for more great adventures. *Booklist* The first series of original novels ever set in the world of *Jim Henson's The Dark Crystal*. *Jim Henson's The Dark Crystal: Shadows of the Dark Crystal* is set years before the events of the classic film and follows the journey of a young Gelfling woman who leaves her secluded home to uncover the truth surrounding the disappearance of her brother who has been accused of treason by the sinister Skeksis Lords. From the Hardcover edition.
